

## Local Fresh Food Waste

We all want to end hunger, end diet related diseases, and improve the environment. They share a common root cause: fresh food waste. The solution is closer to home than you ever thought possible.

### A HUNGRY FAMILY LIVES HERE

One in four young children live in a home like this. They rely on a nearby food pantry for help yet no fresh food is available.

### A HUNGRY SENIOR LIVES HERE

Or a hungry veteran, or possibly someone struggling with HIV/AIDS, Type II diabetes or childhood obesity. Millions desperately need healthy food yet can't get it.

### 42 MILLION GARDENERS

Grow 11 billion lbs more food than they can use. They hate wasting it and yet have no idea that a nearby food pantry would LOVE that food donated.

## FOOD PANTRY

Nationwide, **33,500 food pantries, soup kitchens and food banks** help the **50 million Americans** who struggle to put food on the table. Unfortunately, they never have fresh health food because the gardeners can't find them and never knew that they could donate the food. **That excess garden food is left to rot in the garden while millions of hungry people go without.**

## AMPLEHARVEST.ORG

THE AWARD WINNING NATIONWIDE SOLUTION

Everything we do and believe in, is to solve hunger and malnutrition by eliminating the root cause – the waste of fresh food.

We do this by way of an elegant yet simple solution – combining information and technology to enable billions of pounds of excess food to reach thousands of food pantries that nourish millions of families nationwide.

Our solution is to educate and enable local gardeners donate that food.
